INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No.

PCT/FI2004/000034

Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)	Claims	<u>1-14</u>	YES
	Claims		NO
Inventive step (IS)	Claims	<u>1-14</u>	YES
	Claims		NO
Industrial applicability (IA)	Claims	<u>1-14</u>	YES
	Claims		NO

2. Citations and explanations (Rule 70.7)

Cited documents:

D1: DE, A1, 2751663
D2: EP, A1, 0300080
D3: US, B1, 6505689

Document D1, discloses a hydraulic system for limiting over production of hydraulic pumps and cannot be used for adjusting of hydraulic power of a mining actuator as claimed in claim 1. Document D2 discloses a hydraulic system, wherein the main principle is to utilize maximally motors, which are set to drive hydraulic pumps in the hydraulic system, by driving these pumps in constant power despite of the varying pressure needs. Document D3 discloses how to arrange hydraulic components in the pressure fluid channels for adjusting the flow and the pressure led to the mining actuators. This way of arrangement is opposite to the claimed invention, which is directed to avoid the need of such hydraulic components, which cause power losses.

Hence, the cited documents differ from the claimed invention. The subject-matter of claims 1-14 is therefore novel (Article 33(2) PCT). Further, it would not be obvious to a person skilled in the art to combine the cited documents, since none of the documents give any motivation or suggestion to such combination. Accordingly, the hydraulic system for mining equipment in claim 1-14 of the present application is considered to involve an inventive step (Article 33(3) PCT). Finally, there is no reason to doubt the industrial applicability.
